

# INDEX TO VOLUME 44

|                                                                                                                                       | <i>Page</i> |
|---------------------------------------------------------------------------------------------------------------------------------------|-------------|
| I. BĀRĀNY and L. DALLA Few points to generate a random polytope .. .. .                                                               | 325         |
| R. BARI and B. P. RYNNE The structure of Rabinowitz' global bifurcating continua<br>for problems with weak nonlinearities .. .. .     | 419         |
| L. BARKER The number of blocks with a given defect group .. .. .                                                                      | 368         |
| V. BERGELSON, N. HINDMAN and B. WEISS All-sum sets in $(0, 1]$ —Category<br>and measure .. .. .                                       | 61          |
| BOOK REVIEWS .. .. .                                                                                                                  | 219, 434    |
| A. COLESANTI A Steiner type formula for convex functions .. .. .                                                                      | 195         |
| L. DALLA <i>see</i> I. BĀRĀNY .. .. .                                                                                                 | 325         |
| S. DANIEL On gaps between numbers that are sums of three cubes .. .. .                                                                | 1           |
| A. G. EARNEST and A. KHOSRAVANI Universal positive quaternary quadratic<br>lattices over totally real number fields .. .. .           | 342         |
| FENG DE-JUN, WU JUN, JYH-CHING LIANG and SHIOJENN TSENG Appendix<br>to a paper by T. Łuczak—A simple proof of the lower bound .. .. . | 54          |
| L. FUCHS and SANG BUM LEE Primary decompositions of torsion modules over<br>domains .. .. .                                           | 88          |
| GEON HO CHOE and SUJIN SHIN Strong shift equivalence of 2 by 2 non-negative<br>integral matrices .. .. .                              | 302         |
| P. J. GRABNER Functional iterations and stopping times for Brownian motion on<br>the Sierpiński gasket .. .. .                        | 374         |
| G. GREAVES Some Diophantine equations with almost all solutions trivial .. .. .                                                       | 14          |
| B. J. HARRIS The form of the spectral functions associated with Sturm Liouville<br>problems with continuous spectrum .. .. .          | 149         |
| D. R. HEATH-BROWN Almost-prime $k$ -tuples .. .. .                                                                                    | 245         |
| N. HINDMAN <i>see</i> V. BERGELSON .. .. .                                                                                            | 61          |
| INDEX .. .. .                                                                                                                         | 439         |
| W. C. JAGY, I. KAPLANSKI and A. SCHIEMAN There are 913 regular ternary<br>forms .. .. .                                               | 332         |
| JYH-CHING LIANG <i>see</i> FENG DE JUN .. .. .                                                                                        | 54          |
| I. KAPLANSKY <i>see</i> W. C. JAGY .. .. .                                                                                            | 332         |
| S. K. KHANDUJA and J. SAHA On a generalization of Eisenstein's irreducibility<br>criterion .. .. .                                    | 37          |
| A. KHOSRAVANI <i>see</i> A. G. EARNEST .. .. .                                                                                        | 342         |
| D. KIRBY The resultant and the Koszul complex of a set of forms .. .. .                                                               | 348         |
| W. KÜHNEL Equilibrium decompositions of 4-manifolds and abstract regular<br>5-polytopes .. .. .                                       | 100         |
| T. ŁUCZAK On the fractional dimension of sets of continued fractions .. .. .                                                          | 50          |
| R. MALTBY Bigger and better subset-sum-distinct sets .. .. .                                                                          | 56          |
| J. MATOUŠEK On discrepancy bounds <i>via</i> dual shatter function .. .. .                                                            | 42          |
| P. MÖRTERS Average densities and linear rectifiability of measures .. .. .                                                            | 313         |
| E. OJA HB-subspaces and Godun sets of subspaces in Banach spaces .. .. .                                                              | 120         |
| S. PONNUSAMY and M. VUORINEN Asymptotic expansions and inequalities for<br>hypergeometric functions .. .. .                           | 278         |
| J. RAMBAU Triangulations of cyclic polytopes and higher Bruhat orders .. .. .                                                         | 162         |
| M. RIGOLI, M. SALVATORI and M. VIGNATI Liouville properties on graphs .. .. .                                                         | 133         |
| N. RILEY <i>see</i> B. YAN .. .. .                                                                                                    | 225         |
| C. A. ROGERS and C. ZONG Covering convex bodies by translates of convex bodies .. .. .                                                | 215         |
| B. P. RYNNE <i>see</i> R. BARI .. .. .                                                                                                | 419         |
| J. SAHA <i>see</i> S. K. KHANDUJA .. .. .                                                                                             | 37          |
| M. SALVATORI <i>see</i> M. RIGOLI .. .. .                                                                                             | 133         |
| SANG BUM LEE <i>see</i> L. FUCHS .. .. .                                                                                              | 88          |
| A. SCHIEMANN <i>see</i> W. C. JAGY .. .. .                                                                                            | 332         |
| R. SHAIL On the asymptotic expansion of certain functions defined by infinite series .. .. .                                          | 401         |
| SHIOJENN TSENG <i>see</i> FENG DE-JUN .. .. .                                                                                         | 54          |
| S. H. SMITH A note on the separation of slow viscous flow near a sharp edge .. .. .                                                   | 239         |
| SUJIN SHIN <i>see</i> GEON HO CHOE .. .. .                                                                                            | 302         |

|                     |                                                                                          |     |
