 - (b) "Αγιοι 'Απόστολοι. About ½ hour farther along the Tapis road, near a spring. MM III sherds, including decorated tripod legs. The walls, however, look Archaic, as do some sherds.

II. FURTHER OBJECTS FROM THE CAVE OF TRAPEZA

(continued from BSA XXXVI p. 131).

The following objects, all said to be from the Cave of Trapeza or immediately outside, were recovered from the peasants in 1937 and 1938.

- 1. (Fig. 1a). Pedestalled cup in mottled limestone. This joins one of the fragments numbered 16 in the catalogue. Height 4.4 cms., diameter 5.3 cms.; cf. a finer example from Mokhlos, Tomb XXI, No. 7. Probably EM II but, owing to its coarser shape might be EM III.
- 2. (Fig. 1a). Small lid in brown steatite pierced for strings to tie it on to a vase. Height 1.0 cm., greatest diameter 2.9 cms. Cf. caps of clay vases EM I, e.g., from Agios Onouphrios (P of M I Fig. 23). EM II.
- 3. (Fig. 1a). Two fragments of bone seal. Conoid. Height 1.7 cms., diameter 2.2 cms. Pierced horizontally by three holes, two side by side, one at right angles. Curvilinear design. Cf. from Kalathiana (VTM Pl. VIII 815). EM III.
 - 4. Base of marble bowl. Diameter of base 3.0 cms. EM II-III.
- 5. Large fragment of the Egyptian alabaster bowl, No. 9 in the catalogue (BSA XXXVI pp. 111, 114). It confirms the height of the vase which had previously been doubtful.
